However, an individual who has human immunodeficiency virus (HIV) infection may be admitted to a facility, provided that the individual would otherwise be eligible for admission according to this rule. In addition, an individual that exhibits signs or symptoms of or has been diagnosed with a respiratory illness that can be spread through droplet transmission, may be admitted, at the administrator's discretion, if appropriate droplet precautions are implemented by facility staff. Appropriate droplet precautions include recommendations from nationally accepted standards, recommendations from the local county health department, and the facility's infection prevention and control policies and procedures at the time of the individual's admission. The individual must otherwise be eligible for admission according to this rule.</li> </ol>
